(CONTINUANCE)

I'm a week or so behind, I've had a few issues. I've been transferred to another prison and, I was put with the other prison rejects what I mean by that is, those people aren't striving to obtain anything, at the other prison I want to lockdown and refused to come out, I felt I would have to protect myself inmates and that prison, a lot of the staff was involved in personal dealing, some officials yell you all there business, and everyone else's all the way up to the warden business I can't use them training people not to be human, emotions are hard to suppress sometimes and every woman in prison isn't ugly. I was down in my spirit because of my living environment, there was 96# women and most of them was lesbian couples, it's the drama, everyday it's awful and sad. I had to be moved now, I'm in a one man cell and in a better unit, here they will listen to you, and I use to be very angry inside I had just had a trial and my whole life was turned up side down, I even contemplated suicide, I was put in a building from the state with people who gang bang you name it, and several times I had to fight, some people will cut you with razor's or

Soak A" Towel in Bleach, Wrap it Around
There fist, And punch you in the face
All of Sudden, That will Blind you And
Take your Breath, Some will Assault you
While you take A" Shower, you can be Jumped,
There's scolding hot water in Every prison
to Cook instant Noodles, Some will throw
that in your face, There's also Home made
Weapons. I don't know what people think
you're not safe in prison, one inmate 81⁺ years old
And will Con you. People can pay someone
to Assault you, Even your food isn't safe
I know A" HIV inmate who was paid 20.00
dollars to put Her Blood in Another inmate food
And she did it, So with ALL LIVE SCAM And
know, I'm very hard to maintain Good Conduct
But, you're put in this world, And Required
to Act like Alice in Wonderland. Prison
System mostly have inmates confined to buildings
There are no College courses And all that
if someone don't care about you in Society
you messed up the state feed you by ounce's
not until your full, And from Friday to Sunday
There is no lunch. So that's why the life
inside these places are so crazy, And it's drama
Every single day. So to regroup And get
yourself together A" personal choice
Sometimes in prison, Good don't mean anything.
1/2 half the prison or majority on mental health
drugs. There's not alot to believe in if you
don't have money you face A" rude Awakening,

ONE Lady Just did 27[#] years, Another 35[#] years
And there's plenty of women, who have done
20[#] years walking around me every day.
I try now, and realize, my part over, and
what if I don't ever leave prison alive,
when someone dies. there's a sadness among
us. I've talked to women who murdered their
mothers after years of sex together, women who
have nailed their children to the floor as a
sacrifice for God, I've talked to two inmates
who was on death row. A lot of women have co-dependents
meaning they committed crimes together, one
woman has multiple life sentences, because
her boy friend wanted to have sex with old women
finally killing one, once you have been accused of
a "heinous crime" in prison you will always
be that file "you're not seen as a person
your crime is always the factor, I plan
to have a wife and rejoin society.
And I started this journey for people to
understand, a lot happens leading up to a crime
I'll never believe, people are born pure evil.
no one cares about the rest, there's hope
for a lot of people. America loves scandal
I love to sensationalize murder. Serial killers
brains have been paid for. But I'm sorry for
my life, I'm sorry for everything I've ever
done wrong, I am honest with myself, I
have no family support, I was in prison
10[#] years and my mother came to see me,
she actually couldn't be proud for me, I

WAS Happy to say, I've Completed motivation
for change, family violence, codependency,
anger management, moral reconstruction, plus
Completed A year of one on one therapy that
COVERS EVERY Group pertaining to the state,
She wasn't happy for me, that was my first
time really seeing, things will never change
with my family. I want A job, A garden
A home, A husband, and to Advocate for children
who life could end up like mine's. I believe
God hasn't bought me this far just to
leave me, I'm somebody, and I'll never be
A victim of circumstance's again, nor make A victim
I lived all those years not knowing who I was.
I was A "steech" meaning I was taught
A illegal life. I thought that was normal,
today I see I was wrong and all the
rest too. I realize when you change it
doesn't mean other's will, it don't matter that
I'm alone, I'm at peace finally, I crave
that miracle in my life like everyone
but I've just existed all my life.
Now, I wanna live. There's A detective
I wish I could meet personally and thank
him, he handled my child molestation case
he has to be A veteran now, because I was
A child. I would really like to talk too
him, and thank him. I'm not mad at life
or hate the police and all that, I know
everyone's not bad. it takes alot too
Admitt who you are and where you come from.

it's lock down time now, Another day sealed
Another day closer to home, A lot of people
will take a lot of secrets to their grave
whether they're in prison or not, today I'm free
on the inside. Now, I try to reach others
within these walls, But for some being
involved in the prison world seem so much
better, And a lot of people will never face
reality. I don't know what, All this will
come too, But this is awesome to have
a voice between the bars!

(Continued)
