

8-10-12

There was a joke I heard decades ago when CDs became popular, pushing cassettes aside, which itself pushed aside 8 tracks: "I'll have to buy the White Album again"

That being the point here, DOC is finally get MP3 players. Way to go Oregon, just missed the mark by 15 years. Now I literally have to buy the White Album again.

It's great that we get to catch up to rest of the world, sort of. There are some cool features. E-Mail from friends and family for a small fee. Same with down loadable photos.

Of course being inmates (sish) we get a huge mark up. 16Gig Mp3 for you free people is what \$150 or so? Not here; 50% mark up is more like it. Songs which are probably \$.50 to 1.00 out there is surely gonna be double here.

Hooked, sure, but if you're a music lover what you gonna do? Eat a shit sandwich and accept it. So pass the mustard..... till next....
