

PRISON FOR PROFIT
21ST CENTURY SLAVE TRADE

page 10 of 23

yes - that's right, 21st century slave trading, the buying and selling of U.S. inmates, that's taking place on the U.S. Stock Exchange, right under your nose.

Every prisoner in the U.S. has a monetary value to the government whether it's local, county, state or federal. Bonds are written based on the person's name and social security number and are sold through a brokerage firm such as A.G. Edwards or Merrill Lynch who has the contract to sell all the prison bonds for the city, county, state or federal prisons. Over 50% of these money market bonds right now are purchased in Japan and China.

I've heard that Wal-Mart and use to be K-mart, also purchased these bonds.

Owners of the prison systems in America is, CORRECTIONS CORP. OF AMERICA. It's headquartered in Nashville, TN. and owns all the private prison systems in America and are selling the commercial paper, the inmate goods that they are warehousing.

This is how it works; A bid bond is done on Form 24, which comes out of the GSA OFFICE (General Service Administration which is out of GAO (General Accounting Office) which is under the Comptroller General. The Blake Bond Bid Bond is promulgated at the time the social security card is issued.

When you are arrested the bond is filled out and they issue a performance bond, which is done from a Form 25, and then they do a payment bond, which is a Form 25A. The bonds are being underwritten by the Banks. This is where the PAIN WEBBER GROUP comes in.

The Plaintiff in all Criminal tax cases in the 25A is the PAIN WEBBER GROUP as the UNITED STATES OF AMERICA. The PAIN WEBBER GROUP is a group of

international businesses. The PAIN WEBBER GROUP is providing the securities for the prisons and is selling the bonds, and the Banks, The ABA (American Banking Association) like LEHMEN BROTHERS, in New York city, are the underwriters on the Bonds. The Banks (the underwriters) is where the money is originally coming from.

A six digit tracking number is issued for the Certificate of stocks in the Commodity and security Exchange in the USA by CUSIP (see www.cusip.com and www.cjts.com the law enforcement tracking software) and a nine digit number (called ordinance number) is issued for the Certificate of stocks going internationally to ANNA (see link for ANNA which is in Brussels, Belgium at www.cusip.com).

These securities are sold through the Commodity and security Exchange. The bottom line is they are selling stocks in the prison system. The jail/prisons are referred to as warehouses, and the prisoners are called goods. They are selling the Good's or the Account as chattel, and as commercial paper on the stock Exchange. yes - 21st century auction block!" Twenty First Century slavery!" welcome to America!" And you wanted to know, why America only has % of the world's population, yet has the largest prison population in the world. Well now you know. modern day slavery!"
