

all of us in the earth are within the context of the western americancentric europeancentric system of white supremacy,

capitalism, and imperialism, within

this context the nation of

ukraine in eastern europe wants

to be independent, what ukraine

wants to do with their

independence is to join the

european union and the north

atlantic treaty organization,

the russian federation with its historic partnership with the european union wants ukraine to be a part of the russian federation and considers what ukraine wants to do with their independence as naziism and militarism, and has launch a war of attrition against ukraine which has cause a humanitarian crisis in europe and has led to the death of many civilians

in Ukraine, Ukraine does not want to be a member of the Russian Federation because the Russian Federation is authoritarian, the western Americancentric Europecentric system of white supremacy, capitalism, and imperialism puts forth Ukraines side of this war as a war for democracy. I question how much the Ukrainian side of this war is a war for democracy when the lead

nation of this system

america has a very strong

anti democracy tendency, i also

blame the system for this war

for making life a zero sum winner

take all thing, and i am sympathetic

toward ukrainians struggle for

independence, the best outcome for

this war is for people to come

together and stop it, there are

many but one way the system

exploits this war is by price

gouging, a antiwar movement will
advance the cause of humanity
and victory will look like a
independent and neutral ukraine,
