

# American History

Do you think Women are equal to Men in American Society?

Yes these days in times I remember back in the Days we couldn't vote Women gain the right to vote (1920) but back in 1971 Citizens 18 years old gain the right to vote. I don't have the paperwork on it anymore, Women got the higher paying jobs now in Society today. Women are raising their children without a male in the homes single parents. I think Women make better judgments on tough choices like stop the black-on-black crimes. And states let's come together as a whole. And some Women today in this country and others are raped and, slaved because they are misunderstood. But they still stand up and, fight for respect. But they make bad choices finding a ~~right~~ man for themselves, they want to be loved and, respected by him. They also have fought for "Women Rights" in the 1800's-1900's. They've come along way in America today. And the struggle was hard but, the Women achieved it!

"This is a two Part Statement"

Well I really don't believe that the society itself will agree, but me I see Women as equal and, some be on the levels because they are the ones making things happen for the Black Race and they are stronger at making changes for the community as well as the country. They have more compassion for helping the people. They do more than men in offices and they don't run from a real challenge. The Women had it worst than men in all races, they have been taken advantage of even today they are in some countries being rapped or treated like slaves. But they still fight and, I feel that their fight for respect alone put them on another level as Women, so my answer is I DO!! I'm open for any opinions and, comments. Words By
