

## \* \* \* \* \* \* CReating Monsters \* \* \* \* \* \*

(CDC) maintains that they do not encourage men to engage in homosexual activity during incarceration. I can assure you this is far from the truth, as I will try and demonstrate here. They have written rules called Title "15" the governs its penal institutions that they are supposed to follow - But don't - first you should keep in mind - Prisons are not run with common sense, many of the rules are obscure at best and local institutions ignore most of the written words.

California Department of Corrections gives known homosexuals female hormones to help develop female features. Althow within the title "15" they suggest inmates not put themselves in provocative situations that would attract unnecessary attention - But they themselves are putting these inmates in situations by making them more attractive. These same inmates were not taking hormone shots on the streets. This is an expensive treatment that they under go and the public should not have to pay this expense.

(CDC) is wholly responsible in creating these monsters or odd looking people. This cycle must stop, and there are a few things you can do to help bring this practice to a halt. Voice your opinion to the undersecretary of the California Department of Corrections or write your elected officials in the state capitol - Together we do make a difference.
