Haiti Earthquake

July 17, 2011

It was an ongoing tragedy last year for 2010. January & November. A lot of Haitians were killed in their country homes, schools, etc. were destroyed they were left with nothing. A boy had to bathe in dirty water at a tent camp not long after the 2010 Earthquake in Haiti.

A Haiti man tries to rescue a live teacher trapped in the debris of a school. He crawls past a schoolgirl who died at her desk. I heard on the Radio V101.5 last year January they raised money for Haiti in Jacksonville Florida outside of a mall in the parking lot so they could try to rebuild their country from everything that was lost.

They were provided, Food, Drinks, Shelter, Clothing and, the list goes on. They had a hard year - in 2010. My heart goes out to them. I've never experienced nothing like that before. After a Earthquake it leaves their country in a "mess" and, it will take a long time to rebuild again. I witnessed it in a News For You Newspaper dated May 25, 2011.

I use to "date" a man that's from "HAITI" He was Faithful to me at the time. HE'S doing all He can to help His people and their country right now as I speak. I just pray Haiti recovers from their disaster and, continue to live their lives at peace. The One's that's still here on Earth.

## "MONEY"

Money is long white-N-green.

Boy it can be seen.

Money is paper thin.

You can rub it on your skin.

Money is something mankind need.

So their Hearts want be filled with greed.

Money pays all the bills.

Plus I can order some Hormone pills.

Money is given to the poor.

So walk right through the door.

Money makes the World go round.

I like the way that sound.

Money is something I earned.

On the streets once I learned.

Money is something you can spend.

And, start a brand new trend.

Money is what the Economy lack.

So it's time for "people" in power to stop being so "BLACK".

Money can't buy us true love.

But, we can received it from above.
