

"A Question For ALL
REGARDING The President's Speech On
"Jobs For Americans Act,""
pg. 1

(9-8-2011)

Peace & Greetings to all, once again it's the DOLL back at you wanting to share a few thoughts about President Barack Obama's speech tonight in which addressed his "Jobs For Americans Act."

In all actuality, the President's Jobs For Americans Act is essentially a proposed Bill, (Created through bipartisan efforts), and this Bill was specifically crafted to exact countering measures so that the unemployment rate, the economy, and in short the whole country, will reverse its demoralizing spirals.

Various aspects of the president's proposed Bill not only intrigued me, but indeed motivated me to echo certain critical features that are not only "wanted" by Americans, but are "vitally Needed" in order for the country to right itself and emerge from the present economically depressing state of affairs the country is now experiencing.

Features like: "Infrastructure" (i.e. Highway Bridge Repairs, Road Repairs, and Fixing and Repairing American Schools); "Small Business Tax incentives directly tied to Small Business's hiring workers and providing jobs"; Keeping Teachers IN school and IN jobs, (thus decreasing the unemployment rate); "Keeping America Competitive," (meaning just what President Obama said which was if China can sell cars to Americans and Americans can buy them, then Americans can sell "Fords", "Chevys", and "Chryslers" to Chinese in China and they can buy American cars as well).

President Obama's "Jobs For Americans Act" sounds and looks like a very much needed step in the right direction towards turning things around, and all political parties need to work together to work our economic problems out

pg 2

and let not party lines (such as Democrat, Republican, Green Party, Tea Party, etc...), frustrate efforts because of an up-coming election that is 14 months away!!

Like President Obama said, "Most Americans do not have the luxury of waiting 14 months in order for Congress, (whom are those whom Americans elected and sent to Washington to work for them), to DO NOTHING" for 14 months because the situation needs addressing NOW."

I also find it extremely on point when the president so cogently quoted President Kennedy's words that: "Most of Man's Problems are Man made, thus it's only logical that Man can solve them."

Forget the constant "Naysayers" and the perpetual DO NOTHINGs who hide behind economist and their think tank reports that they use to justify their positions to do Nothing and watch America crumble for the next 14 months. What economist say, they will say, (cause that's what they get paid to do. The real question is what will Americans do??

People Need jobs NOW! The Country Needs to repair its infrastructure NOW! The Country Needs to be Competitive NOW! The Economy Needs to Right itself NOW! America needs to be Americans NOW! So, in conclusion to my thoughts about the President's proposed bipartisan "Jobs For Americans Act", I simply ask you this all too familiar question: "What will you do Now, support the President's Bill, or will you do nothing, (and do nothing to motivate the Congress man or woman whom you elected), for the next 14 months?"

Just Something To Think ON
