Dear Mr. Singh:

This is to respond to your letters. I will discuss the Time Magazine article regarding new treatment strategies at the MAC meeting today with you. I referred your notes on inmate Snow to Medical Records supervisor for assistance.

As far as the SB442, that would apply to hospital patients. However, your concern about translation can still be addressed. Either we do provide onsite translators, including sign language, or have translators available via telephone for those patients who cannot communicate in English. Please let me know if there are patients who have not been given this service.

Sincerely,

A handwritten signature in cursive script that reads "Scott A. Heatley".

Scott A. Heatley, M.D., Ph.D.

Chief Medical Executive
