"All that we see or seem is but a dream within a dream."

— Edgar A. Poe

* the window *

INTERESTING POINT OF VIEW, to be just a form of consciousness.

LIFE TO ME IS NEVER ENDING ENERGY. WHEN COMBINED WITH DIFFERENT ELEMENTS LIFE CAN BECOME SO COMPLEX THAT IT CAN STORE IDEAS, MEMORIES, ETC. ONCE THAT COMPLEX PROCESS ENDS OUR ENERGY MOVES ON.

If you take the sun's rays as an example, the sun gives off energy which get soaked up by plants, turned into food and it keeps going and going.

ONE QUESTION I'VE NOT GOTTEN A SOLID ANSWER IS: What causes energy to stick together with other energy to create a complex entity?

You made a statement about taking chances. Are you a risk taker? What are some recent (or past) risks you enjoyed.

Always,

James
