

Does anybody know the flight # of the Alaska Airlines plane that went down off the coast of CA in '99?

Does anybody remember this at all? My friend's mother was on this flight.

I bring this up because the guys on the Patriot Radio News-hour said that AK Airlines has had only one jet go down; outside of Tureen in '71.

They did trace the problem back to the "elevator" assembly; so they conducted a nation-wide inspection of all MD-80's in the country, but they knew they wouldn't find anything; this was the original "isolated incident".

So if anybody can tell me the flight # of the Alaska Airlines plane that went down off the coast of California then let me know - please.
