

## DANCE GIRL!!!

Its something about music and women that go hand in hand. I noticed everywhere I go or have been that when women are around and music comes on they come alive. They get to twisting their hips, moving their hands, grooving, and just enjoying themselves.

Me personally, I love to watch (smile). Now I'm not on no creepy stalker type of watching (HA HA), its more so I love to watch women light up the room with their smiles, dancing, and enjoyment while doing it. Women will dance alone, with a man, their friends, or even up on the bar... girls truly just wanna have fun.

I say "Dance Girl!!!" You don't know how much excitement you bring to any atmosphere simply by enjoying the music. So if your a good dancer or not, don't stop doing what your doing because its always a sight to see... And it definitively makes being somewhere a little more enjoyable.

I will close this by saying just for fun stop reading this blog, turn on some music and just Dance Girl!!! Fellas you too... light'n up (HA HA).

### Questions?

What music do you like to dance to?

Can you actually Dance (HA HA)?
