Courtney G.

I seen some things on t.v. and wonderd if you can enlighten me on what there all about:

- 1) Reference is continuously made "Download at your APP-store" ...
What is an "APP-store"?
- 2) How does iTunes work?
- 3) What do they mean by "unlimited messaging" and "unlimited data"?
- 4) What is "WiFi"?
- 5) Can anyone create a web page?
- 6) What is an electronic "notebook"?

I dont wanna overload you (haha), I'm just really out of touch with alot of things technologically and I know I'll need to know what these things are and how they work. Anyways thanks for the updates and hopefully you've been able to enjoy this amazing weather out there where ever you are. Thanks again.
