KNEE PAIN & LEG MUSCLES SHRINKING

I have severe pain in my left knee, I can't run & I walk with a limp. Also all my muscles in my left leg are shrinking - my butt, thigh & calf muscles are all shrinking. A friend of mine told me, I might have a bone disease called "OSTEOMYELITIS". Has anyone out there know anything about this disease? Does anyone out there know what might be wrong with my left knee & left leg? I am in pain 24/7. Every step I take, I have pain in my left knee. I'll deeply appreciate any help &/or advice for my problem. Thank you very much. <sup>My left leg is 1/2</sup> the size of my right leg.

I am a Christian & I pray every day for help & support while I'm in prison. I have very little & am very hungry/starving almost every day. The meals they serve us here are very very small. I keep loosing weight. Also they only give us 1 roll of toilet paper & 1 soap each week. If we want anything else, we have to have money to buy our cosmetics/toiletries/food from the store/canteen here. But I don't have any money to buy those things. If anyone out there wants to help me - can you please send me some money, by money order OR [www.JPAY.COM](http://www.JPAY.COM). I'll deeply appreciate it. My prayers will be with you, GOD BLESS YOU. & Please write me. Thanks,
