

Our current U.S. President has asked for creative ideas to:

- Grow The Economy
- Create New JOBS
- Develop ways to produce clean energy
- Reduce Crime and recidivism rates
- Create, ~~and~~ Positive Youth Development Projects.

On behalf of the New Generation of Americans in the State of California,
I propose to you a solution based idea that accomplishes all the above:

#1. For The U.S. Department of Energy to meet with MR. William, MR. T. Pain, MR. Raylon Evans, and The California Department of Corrections & Rehabilitation, Calif. Attorney General Kamala Harris, Gov. Jerry Brown and State Sen Barbara Lewis. To discuss Grants and Funding to purchase and maintain all Confiscated Properties and Solar production materials from The Solyndra fiasco. Also Requested to attend meeting is Calif State Sen. Curran D. Price JR. D. Los Angeles.

#2. The Solyndra properties location's will be renamed California Solar Energy Project and serve as the new headquarters for the proposed CalSep

#3. The Purpose of CalSep is to provide employment immediately for California tech Graduate students in the fields of Science and Solar Energy. These students will teach solar tech skills to prisoners making parole dates to secure immediate job placement at parole, automatically lowering crime and the recidivism rate due to the high rates of parole system program failure.

#4. Innerscity Youth Programs that have already begun to train youth can reference the Youth for Employment at CalSep and let's begin hiring our unemployed fellow Californians NOW, before the November elections, our President and this Nation needs big results right now. This is big and doable, I'm talking NOW kind of doable. Stimulus Funds and Grants from the Dept. of Energy can be placed perfectly into a project like CalSep with full returns as it pays for itself.

#5. The workforce created by Prisoner Team will begin the process of transforming Every Calif State Prison into self contained solar power plants that harvest energy from the sun by way of Prisoner Trainees installation of solar panel technology on the rooftops of every building within each prison. Moreover, the reserved harvested energy can automatically be transferred directly into the grid. This also brings jobs to the community as most of the work will be done by employees from Free Society and moreover this proposal sets the stage and standard for California Freedom from out of state energy dependency. This project not only pays for itself but also pays off those out of state contracts. There is zero excuse as to why the state of California is not the leading clean energy harvesting state of our nation.

— Generations Connected —

#6. The workforce created by Innocity Youth Team will not only be the supervisors of those inmates that do achieve parole from the prison workforce, but will also be tasked with traveling throughout the state installing solar panels on homes, hospitals, fire dept's, county jails and SuperMarket chains set at competitive ^{but} low rates against the competition in a mission to make all of California a solar power state, again with the reverse being rerouted to the grid. This team will also set up a first wave squad of it's most articulate speakers to travel throughout every state in the U.S. acquiring contracts for the advancement of "your state" sep so that the future of this country will at the least see every prison, county jail, city hall, capital, fire and police departments and especially hospitals and crisis centers to all be independently energy sufficient, self contained entities especially during times of national and local disasters. Nonclean energy must fall to the level of secondary and backup sources of energy. This proposal is the Paradyme Shift Pioneering Project.

#7. This proposal brings California again at the forefront of innovation and the first to answer the challenges we all face as a planet. Mind you, to date, there is over 30 prisons in just the state of California, that's over 30 solar power plants harvesting the sun's energy and feeding the power grid.

#8. The Solyntra Frasco will surely be an issue in November 2012. It would behoove you to join us as we intend to end that topic in November with the positive effects on the economy that bold choice made by our leaders in government made that redirected failure into success. It's Go Time.

T-Pain

► Rapper T-Pain turned a query into a nonprofit agency. With his newly launched organization, If I Could Change the World, he asks people to submit a short summary of an eco-conscious improvement. Each submission has a chance to receive sponsorship—and change lives. (changeworlds.org)

Will.i.am

► Grammy winner Will.i.am scored a connection with Intel to talk change. Together they work on TRANS4M, a think tank that meets with scientists, CEOs and style icons to address environmental hazards and create enriching solutions. (facebook.com/progressthru-processors)

- #9. not only does this proposal keep Parents and Family members out of Jail, but it also provides the men and women serving abroad to return home with hightech employment opportunities outside of just law enforcement jobs. Our military families are already prepared for this new clean energy movement and ready for employment.
- #10. Parole Agencies can also be able to effectively monitor the progress of a parolee as the relationship between the Department of Corrections and the inmate transcends into employer employee. One of the Solymate Properties can be used as a transitional setting temporary housing project for our employees and parole agencies to work closer with each other to assure smooth and safe transitions back into society. I want to personally hear this division along side my son Raylon Evans, wife and daughter.
- #11. The multiple Solymate properties are sufficient to maintain this new constructive idea, this is a new generation's ERA, standing ready to answer the President's call, responding to Mr. T. Pains Challenge while staying in step with the standard of excellence set by fellow Californian Mr. William, Sen. Barbara Lewis, Sen. Price, Barnd Boxer, Pelosi and others. Especially our fellow Californians that need jobs as you read this proposal. I'm poor as well, arrested for a street crime that cost a man his life.
- #12. My name is Floyd Smith #K-72700, I'm a condemned prisoner housed at San Quentin State Prison, I have a 20 year old son in college and a 17 year old daughter in the juvenile justice center, for a personal look at me go to BtB.org '4561
- #13. My will is to publically be remained anonymous, I request that this project be the accredited legacy of my generation next, specifically, my son Mr. Raylon L. Evans.

Thank you for your attention
and this was my best handwritten effort with
a thumb injury.

Sincerely Floyd Smith Jr. K-72700
