

OPINIONATED...

6-15-12

YET again today, I saw something that really chaps my hide... Our lovely doctors (??) Mengele and Kevorkian (HEY! THERE'S NO AMA oversight on CACR Docs) are taking away people's medications and bunk requirements for sadistic pleasure (there can be no other logical conclusion... read on...)

I spoke with a very sad and upset inmate today. He is in his 60's, he is crippled in his leg, he has a lot of back pain, arthritis, sciatica and truly fits the description of a physical basket case.

One of the NON-OVERSIGHT-NEEDED "poseur doctors" took away one of his pain medications that does work, replaced it with nothing and told him "You're faking it." He also took his lower tier, lower bunk chrono and his cane.

This inmate is not alone. 3 years ago, a blood clot almost killed me, this same "Doctor" told me I was "faking it!!" Fortunately when my leg swelled the size of a watermelon and turned blue, another "Doctor" sent me to the hospital where it was discovered that my main vein in my leg was now 86% blocked from ankle to mid-thigh. But ya know, we inmates are all fakers!

Another 100 to 300 inmates lives have been placed in grave danger by this "Doctor". He is being sued by many, he is the highest receiver of medical complaints at my prison. Yet he is

allowed to continue killing inmates without oversight, without censure, without fear of losing his medical license.

This is why Gahlitzfohnya is in Federal medical receivership.

How much greed and corruption have the people got to stand? How much pain and suffering of inmates and their families must there be?

Why should inmates be subject to this torture? Are we trading torture for time? If so, send people home. Torture AND Time? What is wrong with a society that gets off on this? Who??:

Dr Phil, John Walsh, Gerry Brown, Adolf Hitler, Pol-Pot, Saddam Hussein, Dog the bounty hunter, Oprah, Steve Wilkos, and probably you!

Must be nice to know you are creating worse citizens every day through simple neglect and profit. But we're 'inmates', not humans... right?
