

Revolutionary Greetings !

6/19/12

Prison Activism and Community Activism both entails a Protracted Process. There are so many critique issues that deserve immediate national support. In recent years many Veteran Convicts have died in prison due to being poorly treated. While some others were misdiagnosed, to find out they had Cancer and it was too late to treat. Allied Media and other related Grassroots media outlets can expose these realities. You have an obligation to tell the truth.

Organizations working to end mass incarceration must build/forge better relations/communications with Political Prisoners / Prisoners of War who are the educators and examples. We are the visionaries promoting change, and encouraging Political Consciousness in Prisoners. You must include (us) in the group dialogue and networking. We should always be apart of the process.

As for my lack of support. Once we become Conscious / Political and begin to identify ourselves as revolutionaries. We suffer a variety of losses. Causing us to be held in Segregated Confinement indefinitely. I prefer to have a core solid group of people on my team. They will be solely responsible for my survival while I fight for my vindication. Visits, mail, is apart of that survival package. When Prisoners don't have outside support — they are often targetted by some over zealous Rogue Police.

(2)

not all of them are like that. Allied media, could focus the charges that occurred first on the federal level. Where over charged crack Co Cain charges were reduced. This should be Done and pushed for State Drug charges.

Media is a Powerful resource to Get the real truth out to the oppressed Masses. With the right touch of media exposure we Disrupt the events terribly. Proper/adequate media exposure has been known to cause (mass) investigations. By such Groups like Amnesty International, and Human rights Watch. I welcome a comradeship with (Allied media) and anyone else Doing this work.

May (Allah) God Guide us.

take Care.

In Solidarity & unity
