

Utah state prison system up here in Utah is very bias and crooked, the whole system. First off they follow under the indeterminate sentencing law with whatever other state that follows the same system, there is only 2 state. meaning the board of pardons has the power to give you all of your time if they choose witch in most case they give you a lot of time.

Board of pardons has too much power to be bias and discriminate towards convicts period and they do.

All this prison is about is money 100.00 fine or 300.00 dollar fines for this or that. The system is so full cause they send 10 to 20 prisoners a day to prison. For people to call there family's from prison cost about \$15.00 to \$20.00 a call out of line that peoples friends and love ones can not afford to talk to them.

Also you dont get proper health care in this prison nothing they do is right health care for prisoners they even got PAs ordering wrong medication when thats the doctors job.

These are the things that us inmates have to go thre w and much more that i dont have enough paper to write about, and

We need help to fight against these wrongful things the prison systems do to use and our family.

I am down to fight for these changes but we also need people on the outside to help us fight that's the only way to beat the system from these wrong
