1 July 12

Thank you for reading + copying of my post-dated 27 April 12 - on "Kneepain + leg muscles shrinking. Do you have any comments for me? You can write me directly at the address below or write me some comments on my blog. I went to a hospital this past week + had a nerve test for my left leg (that was shrinking & is $\frac{1}{2}$ the size of my right leg). They tested the motor signals of my nerves + said the nerves from L3-L5 were weak + I need a MRI of my lower back. He said the ~~knee~~ knee problem (left knee is causing me severe pain 24/7) has nothing to do with my nerve + left leg shrinking problem. So I'll probably need a MRI of my left knee also. Wish me luck. S
