

Hello From  
Matthew Jankowicz

6 July 13

I NEED HELP FOR MEDICAL LAW SUIT

I have been in a lot of pain for the past 3 years. The pain is in my left knee (mostly below the knee cap) & in my lower back & left leg. Because my left leg is now  $\frac{1}{2}$  the size of my right leg - the doctors here finally agree there is something wrong with me. I am still in a lot of pain because I haven't been fix yet. I went to a nerve specialist last week & had my nerves tested in my left leg. He said the nerves from my L3-L5 vertebrae are weak (the motor signals) that tell the muscles in my left leg to grow. He said I need a MRI of my lower back. I am still waiting to see if the doctors here will give me a MRI.

The nerve specialist said the pain in my left knee is a different & seperate problem. So I still need a MRI of my left knee. The doctors here say nothing is wrong with my knee - but that is were the most pain is. The pain is 24/7 & wakes me up every night. I take up to 8 Acetaminophen & 8 Ibugrofen every day & they don't help with the pain. So I am suing to get help.

If anyone out there can help me with legal advice or/ & money for legal help - I'll deeply appreciate it with all my heart & soul. You can send me money by "MONEY OROSE" or "www.JPAY.com". Thank you. Feel free to write at my address below or respond to my blog. GOD BLESS YOU. ☺ Use my CDC# F25827 for the "JPAY".
