

Courtney G, my hands are so full (doing 3-5 suits for others, studying psychology & other books, doing art), but I am intent on completing & posting the longer discussion of psychological abuse, neglect & torture of prisoners you asked about. Be warned that it's not all quite as conspiracy theory-ish as you might suspect; often it's other prisoners who are most to blame, yet something causes them to be that way too. It's the "something" that causes people to be the way they are that most interests me, as it's that "something" that we ought to eliminate.
