"Our President Barack H. Obama" / "Success"

He signed the Stimulus Package Bill. It was for and passed out to a lot of people like Middle-Class, Low-Class Citizens. He created a tax break for the College students and the school kids to receive a scholarship. He signed the Bill for Health Care so females could afford free sonograms and pap smears at a Doctor's office, which the government pays for. And we as the people can get free medical treatment. He supports alternative lifestyle living people here in America I like that. He made away for them to be accepted to work in the "military". He tried to get the law passed so they could get married to each other. In The United States of America, legally. He brought majority of the troops home from Afghanistan. He had Osama Bin Laden eliminated May 1st 2011 which he was living in Pakistan at the time. For the attack on "The World Trade Center" back in September 11th 2001 which was told he was involved in or behind. And he had Muammar al-Qaddafi assassinated the former Leader of Libya. To me those were ^(+two) great accomplishments since he's been in office at "The White House" in "Washington D.C." that shocked the World. I don't look at the individual I recognize the (Deeds) he's done in America that's what counts. "I was told America is the Land of the Free." So just live your Life". How you want to.
