

Joshua Funds

HELLO my name is Jennifer Johnson. My son Joshua Johnson died when he was four months old. The autopsy doctor stated he thinks he died of Blunt force injury to the abdomen. Which I am disputing because nobody in my house-hold would abuse Joshua or any child. As a mother I am questioning the report because the State Autopsy doctor said he thinks this what happened. In the beginning he also said my child should have been bleeding out the mouth but then the autopsy doctor changes it. Said that is not true. I am seeking donations to help me pay for a lawyer to get my son exhumed for second opinion of cause of death. Joshua wasn't progressing physically like a normal four month old. One of the things that sticks out for me on the autopsy is he had pneumonia. His pediatrician said he only had a cold. Who is to say he didn't die from pneumonia? Please help me find out the cause of my Child's death. Thank you.
