AGENDA OUTLINE FOR PROGRAM

The first month's curriculum is as follows:

Point 1-2: Identifying problematic behavior, self-forgiveness, and healing process, will consist of dialogue and gaining individual trust. With the foreknowledge that everybody is not going to like one another, just like in society. But to develope the means to be diplomatic within these forms of relationships relying on professionalism. This is the foundation of a commonunity (community).

Then we go more indepth with breaking those old habits and a re-birth ceremony and process dealing with bringing purpose and meaning to ones own life by learning how to activate the skill of self-reliance.

The second month will be:

Point 3: Setting goals by using the visualization techniques which is accompanied with positive reinforcements. along with progressive meditation training.

The third and fourth month's will deal with the more developmental aspects of the program, which will be explained to any body that is interested in endorsing the ideas presented in this proposal.

I look forward to talking with any and all serious parties that truly want to make a chang in the inner-city communities.

Along with this posting I am including a certificate showing that I have already successfully instructed inmates in another re-entry program that I developed while incarcerated. So I hope to hear from you soon.

You can blame me for my past but the future is up to you!
