

Addictome's & Other Operations.

10/22/92

I TRY SO HARD to keep an open mind, HONESTLY I do. HOWEVER I must comment on this observation many have made here.

There are any number of homosexuals in prison - latent, closeted, out, flaming, etc; and they are on both sides - employees & inmates alike.

What I find stupid/insulting is that the taxpayers of der state are paying for hormone shots for all of these wanna-be-whatchernots. To the tune of thousands of dollars a month per inmate or employee.

And heres the rub...

You have all these female employees who WANT to be men &/or possess "Male" equipment. You also have all these male inmates who want the 'female' equipment.

You'd think that in order to save taxpayers some of the few deutschmarks they have left, we could simply get these folks all compatability tested DNA wise, pay the one time operation costs and trade off all the ovaries, tits, dicks, balls & accessories once and for all.

While we're at it, why can't inmates be allowed time off their sentences for organ donation? What's the good-time credit equivalent to \$ spent for say, a kidney or a lung? $\frac{1}{2}$ a liver?

Addicted to me cont...

10/22/12

Of course, the answer to those questions, as jokingly as they are put, is that the system is so COMPLETELY broken, so corrupt, so inept, that any simply obvious solution to any medical issue is totally lost in bureaucracy.

For instance, let's ask some more 'reasonable' questions:

- Why did my friend R.R. die of a cold?
(misdiagnosis)^{cause:} - end stage heart disease)
- Why did an acquaintance, Sean die of appendicitis?
(misdiagnosis)^{believed} - hernia or gas)
- Why did an acquaintance R.R. go out for a simple operation & come back with a perfectly good kidney stolen?
(diagnosed: aortic aneurysm... fixed, but where is the kidney?)
- Why was I almost killed by a blood clot I knew was such?
(diagnosed: FAKING IT... (My leg was double sized/blue. Faking what?!?))

And there's many HUNDREDS more. The CDCR KILLS your children, husbands, brothers DAILY due to complete moronic failure.

I DO NOT THINK a receiver can fix this, but good luck anyway. Then again...

... It's not so bad to be dead like me!
