

Greetings friends of the Ella Baker Center!

Here at the North Kern State Prison we are being let out of solitary confinement. Even though our fascist oppressors still refuse to let all New AfriKKKans, Latinx, Native Americans & poor whites out of these concrete tombs indefinitely for the ones that have been released we intend on forward movement in this positive struggle and have had inner racial exercise circles at our yard time, even though it's only twice a week, and inner racial study sessions in our dayrooms. We have a United peace amongst all ethnicities and the end to all hostilities ~~now~~. We hope last throughout the prison diaspora, so our elders who've been trapped by the beast for over 25 years can be released as well. The day to day battles we will face by our captors won't deter us from reaching our goals of liberation from these confines and being productive citizens in society where we can also help change these laws that put a lot of us here unjustly in the first place. We thank you deeply, all the outside support who've wrote letters to the California department of corrections, and posted all the solidarity you've showed us on the websites. All collectives such as: The S.F. Bayview, CAprison focus, The Abolitionist, Critical resistance, Solitary Watch, All of Us or None, The Piss & Rock Newsletter, all the lawyers, all the visitors to all the SHU's to take statements from comrades of how solitary confinement is cruel & unusual punishment. Thanks to all the family's of never giving up and know that this is just another small battle and the war is still far from over.

With love & struggle
comrade T
