

* THE CALIFORNIA DEPARTMENT OF
* CORRECTIONS ENCOURAGES INMATES
* TO MASTERBATE TO FEMALE GUARDS.

* * * * *

Within the construction of the CDCR
operations manual (Title 15) They strictly prohibit
lewd acts and direct all inmate and staff NOT to
place themselves in sexual situations that would
encourage sexual activities. Here there is a double
standard that is going on.

Male inmates are viewed nude by female guards
and they even watch us get stripped searched in
solitary confinement. They suggest that men's magazines
were the sole reason that men were masturbating where
female guards would see them - so they banned all men's
magazines. There are only one type of inmate
that would ever consider lewd behavior (A pervert)
If a man is going to make sure the female
guard sees this act - it would have nothing to do with
a magazine - most prisoners are very respectful to
female guards. It's a small minority that do such things
There is no supporting evidence that magazine
would encourage lewd behavior. However sex offenders
get off showering out in the open where they
know females watch - this prompts inmates to fantasize
and to play with themselves. CDCR has got it all
backwards. It's because of their perverted rules
that actually encourage masturbation - open showers
is huge in getting men to play with themselves.
Most prisoners believe the guard would not bid on
that position if she didn't like those sexual situations
so if all areas were closed where nudity comes
in to play - masturbation would cease.
