

under the global entrenched
intractable written standing
enforced laws, i don't have the
right to physically defend my
self against this system of
racial & class justice, of
imprisonment & torture, i feel
obligated as a human being
to defend myself against
this, for my humanity, so this
makes me a racial & class
extremist, & this system
will use this to justify my
repression, in that i have a
political style of defense,
this system will further
justify my repression by
saying i'm antiestablishment,
in that i can only effectively
defend myself against this
system by organizing, which
this system see's as my
being terroristic, this is all i
can do to defend my humanity,
& there by defend humanity,
against a system which is also
a threat to humanities planet

earth, i'm involved in a
on going on off individual /
personal hunger / work strike
in solidarity with the on
going prisoner strikes across
this country. all this make
me a target of this
prison administration, a
administration which is
skilled at using my race to
reinforce me being their
target, by getting their
inmate stooges to feed in to
targeting me, i was a
target of a assassination
attempt by a white
supremacist leader because of
my civil rights work in
society, which is why i'm in
prison, in prison i was a target
of a assassination attempt
by a white supremacist
inmate who informed this
prison administration in
writing shortly before the
attack that he wanted to
kill a black person, we ended up
on the same work detail
together, with me the only

black person on the work detail,
the guard who headed this work
detail made constant jokes
about me being killed, so after
the attack i filed a federal
civil rights law suit stating
this made for a hostile
work environment for me &
contributed to the hostile
atmosphere of the attack,
after several months this
suit was dismissed with
prejudice, stating i should take
it up with the inmate who
assaulted me,
