NEUROSCIENCE?

I read an article about a breakthrough for paraplegics. It's something placed on the spinal column by the lumbar area.

What's your goal in neuroscience?

Desired 20 years of studies. :)

As far as big food portions, a lot of us have big body portions to. Except me, I can't gain weight. I'm about 5'3" at 140 lbs.

Do you "grumpy"?

Are you male or female?

Where were you born?

I was born in Parana, but raised in Tacoma, Washington - USA.

I have 3 sisters and 3 brothers.

And you?
