

How are You B+B Viewers I hope well. Let's talk about these low down dirty snakes and how much they wanna be dictators, but they are miniature dictators, they wanna be in control so much they are willing to sacrifice their state image and their own citizen to show their masculinity over groups that's has many faults in life. They act as inmates are not citizen any more in "Freedom American" They rather substitute the title Dairy State for the Prison State, What ego monster would do such a thing. Oh Doc what that stands for Department of Corruption! As I said in my other letter I post last week. they create hostile environment then say to the Public these inmates are heartless uncontrollable wild people we need weapons to be able to tame these inmates and to protect are self, you and I know ~~Wisconsin~~ Wisconsin is the last violent Prison state in the U.S. The last time an inmate dead from another inmate when Jeffrey Dahmer dead and that was around 1993 I believe. Doc get weapons not to protect these self but to cause harm to us inmates, but that's not what I want to touch up on I want to touch up on ~~an~~ economic stand ~~Point~~ Point. The Government can make these Prison self efficient but they rather let the tax payers "you" pay for these capable resourceful Prison. Allow me to elaborate on how these Prison can be self-efficient and save tax payers money. You and I know there are inmates are never going home there just sitting here right along with there money that they gain from filing law suits and other things. So why don't the government come up with a way for inmates to spend there money outside these wall productively. If the government create a program to allow inmates to invest there money in to a company or open up there own Business. Now think about how many professional people inmates will have to hire to run their company/business. They will have to hire a lawyer, Account, Business manager, Assistant, employees and many more. When the inmate make a profit they will have to pay the government 15 percent of their profit then out of the rest of the profit they will be able to pay off some of there ~~debt~~ debt it would be a win win for everybody so all the government have to do is create a program and have the inmate sign a contract (those who what to participate) saying out of his or her's profit, he or she will pay 15 percent to the government and pay off some of their debt. Then for ~~the~~ the other inmates that have talent can sale their art work or their ideas and then the government can profit. Then when every that inmates goes home they will have money in the bank and that will cut down on crimes so that mean crime rate will go down. You have singers, rappers, ghost writers who write songs. You have inmates that write books and other things. Now look at that and tell me that Prison can't be self-efficient. You ~~get~~ the concept I'm trying point out but the government rather for a inmate to go home as he or she came in "broke" that their for inmates to return to Prison. The Government can make millions of dollars if they stop being control freaks. They prefer to focus on changing are identity and exploit us for the wrong reason. I read this sociology book and it had this word (Total institution) and for the people that's not familiar with that term it means An institution in which individuals are cut off from the rest of society so that their lives can be controlled and regulated for the purpose of systematically stripping away previous role and identities in order to create a new one. This is what your government is focus on not giving out tools to stay out of Prison that give us tools to stay in Prison. These people as in Doc profit really big off of us as in are living bodies. Doc rather waste money by buying food that inmates want eat and then the institution have to throw away the food. For the food do eat Doc can charge inmates \$7.50 for double portion on food inmates will pay for that. I work in the kitchen and witness all the food being thrown away they can sale the left overs to the inmates and make some of the tax

Payer Money back. Now most of the institution in Wisconsin have cable but we get the basic channels the tax Payer are paying for that cable box so why dont the institution just take a dollar from each inmate each month but give us all the channels or just allow each race to pick two or three channels that we want and then the institution would make a profit theirs many ways for the Doc to make money off of us they just rather look at the Prison as factory or mills know matter what we did to get here as in Prison we are still Part of the United State. If we are willing to participate in helping to grow the economy why dont the Government make that possible for us to allow us to be productive. They should be encouraging this type of positive thinking from inmates. The only way these Prison become self efficient is through you my voice is not loud enough to hear through the walls so lets make these Prison self efficient and save tax Payers money so help me put these ideas in motion thank you for reading my blog I will do like last time and leave you ~~with~~ with a poem or two well I'm about to park my mind until next time Be early Bt B View Take Care I hope you enjoy the poems. Please for give my hand writing Im in the hole.
