

a wild cat strike in the northeast united states, focusing on transportation starting the first non holiday week day work day of the month, will disrupt domestic travel from the region for several hours, & will disrupt transnational travel from the region for many hours, this will make for a emergency situation, with emergency procedures, thus by passing tradition state power, there in lays the basis for self governance, which will only come from a weaken central government, & the state has a well rehearse play book for this type of situation which is criminalization & repression, which is the most common point of failure in revolution, to be successful this has to be a determine effort to expropriate the infrastructure for self governance from the

government, in this it is extremely important to show solidarity with other radical workers movement such as in Europe, & focus on a higher minimum wage, a shorter work week, freedom for political prisoners, an end to imperialist war, & the use of boycott against criminalization & repression, & it is extremely important to focus on crimes against the people such as construction of wretched slums & insanitary tenements of the poorest & cheapest material, & the destruction of great quantities of food stuff in order to keep up prices, all of this can be organized under the umbrella title social revolutionary party, with me listed as founder & chairman, instead of a central committee the social revolutionary party has radical workers committees, which are the party governing

bodies, the party governing  
bodies must be on constant  
guard against the states  
infiltration of agent provocateurs,  
& the party must also be on  
constant guard against  
infiltration by any sect of  
criminal elements
