# Real Talk and Real Thoughts from behind the Sun:

I David M. Wilson present to you a Blog of real thoughts, Ideas, Opinions and insight from a lost man behind the Sun.

I am locked up in a Wisconsin Prison. I have made many bad choices and mistakes in my life, but I use each and every day to better myself as a man and a productive part of Society.

I am not in the world but I'm still of the world and most important I have kids that are a part of this world.

So I will give you my Opinion and perspective in a raw (but respectable) form.

First, I would like to speak on the alarming high rate of Murders in Chicago and all other urban areas.

(x)

I'm from Chicago (South Side wild hundreds). I was born, bred and raised in Chi., so I know the mind set. although I am older (47) and I come from a different time, but I now come from a place of growth and development.

I love my brothers & sisters (Black, Brown or White) but we are losing and don't even know it. (Not everyone.).

The young brothers of the day are lost as they let Happen's. Drug Dealers and the Hip-Hop Culture dictate their existence, this street culture has made it fashionable to stay in the "Hood" and respect their fellow Man. we must start to better ourselves and want more for ourselves.

This Culture has caused many of us to differ from our needs and dreams as we succumb to our wants.

Why do we kill each other without a second thought or care in the-

World. Is it about Money, Drugs, Territories, Disrespect or just because you just don't care about your selves.

I dont believe this. But I do know that in Reality the Hood hasn't lied to us, but the people in the hood who perpetuate the "Money over Everything" mentally. The Hood has given us some very clear warnings signs that it isn't to be fucked with. Just look around. The Hood is a den of iniquity, a damsel of deceit-Poverty, Big-no Stores, Drug Dealers, Drug Addicts, Gang Bangers, Pimps, Prostitutes, inadequate Education, School closings and Trigger Happy Policeman. Like the late, great Marvin Gaye said Mercy Mercy me.

But I have not given up on my fellow brothers.

For all the negatives that surrounds us there is an abundance of Positive.

a lot of our brothers and sisters are Smart, Thinkers, Innovators, Do and Workers, Hustlers and Visionaries. We must continue to believe in ourselves, Save our Money, Uplift the Community, Respect our Women, Raise our Kids, be a voice for Justice and positive change. we must become better people today than we were yesterday.

This is my Goal and it should be yours also.

We only allow ourselves to be held back when we refuse to move forward.

This has been Real Talk and Real Thoughts from Behind the Sun...
