NEWS FLASH: PARIS JACKSON, 15, reported attempted suicide ON JUNE 09, 2013.

The daughter of the late great King of Pop Michael Jackson was hospitalized with alleged butcher knife cuts to wrist, and overdosed on Ibuprofen pills. She allegedly called for help to suicide hotline.

Her father wisely again and again declared that he did not want his Toxic Jackson Family to have his three precious children. He nonetheless left his mother Cathrine to cope for them.

And if she became incapacitated then Ms. Diania Ross ought to assume guardianship.

Therefore, it was clearly Mr. Jackson wishes to separate his precious children from his Toxic Jackson Family as he

Separated from them in his latter years.

Remember MR JACKSON ONLY left his mother monies in his will.

Who would know these serious matters better than him.

His will was apparently thwarted.

Now look at his "Apple of his eye" - Paris Crisis

Diana and Debbie Rowe heed Paris and Michael's screams for help, and get those three precious children away from the Toxic Jackson family.
