

# WAR ON TERROR

Hello, I have some ideas about our countries war on terrorist and they are probably not going to be very popular but all the same, I believe it's the only way to win this war. We have to go after the countries - companies and individuals which are financing the terrorists. We have to invade or deny any kind of aid or business to the countries who support terrorists in anyway. Take all of that countries assets in this or allied countries, place embargoes on that country and any countries which maintain financial ties with the terrorist supporting country. If that doesn't change the offending countries policy to support terrorist, we should use our Airforce and missile assets to destroy all that countries military assets. If that doesn't work we should invade and establish another democracy. As for companies we should freeze and re-claim all their assets in this country and deny them and their affiliates the right to import to this country. Individuals are basically the same except if all else fails we should put a reward out for their capture or death. We should use any means necessary, from hackers to kidnapping to assassins. Tactics like this are our only chance to win the war on terror, all comments welcome and will be answered. PEACE IS DOWN.
