

emancipatory revolution is the human challenge, which is the liberation of humanity through hearts & minds, oppose to the liberation of humanity by fists, emancipation is unique in that it's individual, what is emancipation for me, may be slavery for some one else, a emancipated human race will be so diverse, that it will make what passes for diversity now, strict conform^oformity in comparison, for some emancipation is slavery, but that is not true emancipation, for some emancipation is the enslavement of others, but that is not true emancipation, for those of us who support the complete emancipation of humanity, it is what can the collective emancipation of humanity, bring to the emancipation of the individual person, & what can the emancipation of the individual person, bring to the collective emancipation of humanity, all of us are with in some over lapping sphere of

influence, such as the internet, the papernet (news letter) & or the humannet (person to person) which means we can communicate & coordinate our activities, which means in a practical sense, we can agree on the administration of public affairs on the basis of free agreement, & to defend all political & social rights against every attack of reactionaries, & to widen the scope of these rights at every opportunity, we can agree to be supportive of anti facism & anti militarism efforts, we can agree to be supportive of such actions as a workers strike to advance workers rights, we can agree on freedom for all political prisoners, & we can agree to end the reactionary wars on terror, on drugs, & on the poor, & we can agree on people power oppose to corporate power, & we can agree on such issues as solidarity with the civil resistance in turkey, & we can agree on all of this as

a platform for a socialist revolutionary movement, & that repression of all of this is genocide, & must be resisted as the only way to fully realize all of this, what i have laid out here in represents the only viable alternative, to oppression, corruption, repression & suppression for the human race, either what i have laid out here in, is at some point successful, or the human race will fail, the human race is headed to failure, this is a effort to reverse this course, i have given my life for this effort, & i have dedicated my life to this effort, joining with me in this, is a honest practical effort to save humanity, & this my effort is also in ways very transparent, & very accountable, a legal third political party status, may give a social revolutionary party some legal protection against police repression, & may also provide equal access to certain public arenas, & making common

legislative cause with domestic progressive political fronts, such as environmental rights, gay rights, & women's rights, will move a social revolutionary party forward, & also put forth the society that a social revolutionary party envisions, social revolutionary party members, should be those who are comfortable with in these domains, updates to this work can be posted on my blog, in solidarity, chairman social revolutionary party,
