CAUTION!

1 of 2

Recently in the news a grave warning has been put out by U.S. officials stating that there is a high probability that Al-Qaeda "insurgents" are putting forth a call to attack U.S. and "western" embassies and 'people'.

To many brainwashed people they'll automatically need this warning and not only that but many will think that these 'muslims' and 'arabs' are really uncivilized and plain crazy. To those that like to seek answers for themselves and know reality, if they have any semblance of truth seeking they'll see that the only and true threat to the world and more so to the region of the middle-east is the U.S. and its war machine.

Much bombast and rhetoric is spilling from U.S. officials of the threat being 'credible'. What is credible is that no other nation on this planet has as many bases as does the U.S. armed forces around the globe. No other nation has brought destruction to civilians and innocent people as has U.S. warplanes (which should be just labeled 'Death Machine'). It's hard to fathom in my mind how a nation that's wrecked havoc and killed millions is able to say anybody else on this planet is a threat? And the saddest part is how many believe these officials statements at face value without any further investigation or proof. Need I remind you of Iraq's weapons of Mass Destruction? Why, the U.S. is the weapon of Mass destruction.

Sadly, the fact is that as U.S. officials close embassies and brace for assaults, many should make the leap to wonder if the U.S. is

to get assaulted in any way, should it come as a surprise? Could anybody honestly say it wasn't brought about? More so, why U.S. government officials are given air time to run their mouth, it's like the fire telling the wind to stop cause it's making it hot! Absurd! But the political climate these days leaves no room for opposing views. Now we see regurgitation on a mass scale.
