ANOTHER DEATH WARRANT.

Time to die! That's what they just told my neighbor Bill Hepp. The Governor just signed his death warrant. And it's a sick helpless feeling watching a man walked off, taken to his death. Bills been on the Row 26 years says he's innocent, that they had DNA he wanted tested. But the lab said they ran out of the DNA and couldn't test it. This is a very sick feeling. And it's time that this sick twisted demented crap that we call capital punishment is brought to a halt! This is just senseless killing that accomplishes nothing!!! And only a liar or fool will say other wise.

I seen on the news this morning, where Attorney General Pam Bondi stated that she didn't have authority to change Marshall Gores execution date, and nor should she have done that. There's just too much power, too much control and too much corruption and stupidity by the human race. We are civilized. says who?!!!! "Civilized is not killing some one, to prove that killing is not acceptable. why not rape the rapist. why is that not acceptable?!! yet killing is?!!

We are a screwed up people. And our bloody thirsty Governor Rick Scott is screwed up with his power to kill. He likes it, He's a legalized serial killer. Please, we need to stop the madness.

Help me.

God bless
In Peace + Love
Connie
