I'm really sorry to hear that you have been sick. And I hope you are feeling better now. And I understand why you're angry at me. And I have to say you're right I did have love when I was with you. And I f\*\*ked it up and I'm sorry I did.

But I think you should know I didn't leave to another state or leave you for that fat girl Katrina she went to New Orleans. And I went to Mississippi then up to Michigan. And I didn't leave because I didn't love you hell I loved you more than anyone I have ever been with. And if I would have known you were pregnant I wouldn't have left at all I would have went to jail for a year and hoped you would still be with me when I got out. And if I had the chance I would change it. And hell if I could I would spend every day of my life making it up to you.

Oh and you don't ever have to worry about making me upset with what you write. Because again I understand you're angry with me. I just hope to hear from you soon. And again maybe get some pictures of you.

And just so you know the poetry I write is just how I feel a lot of the time. I write it to get it out.

But again I hope to hear from you soon

Joe
