

Daniel Gwynn Blog Update

Date: 1/1/14

Subject: "New Tech"

New tech will be introduced to the prisoners at SCI-Gr this year: GTL Genesis 116-PA. This GTL Genesis in-pod has 7" multi-touch LED screen, 512 MB memory, and 16 GB flash memory. The cost has not yet been determined. We'll be able to purchase PG13 movies, games, music & books through our commissary. Nothing is free. There's no internet access. We can only access what the prison provides. Without internet access, I can't find use for it. All I see is another way for the prison industry to dig even deeper into our pockets, and to save money by eliminating excess hard copies, cell content & eventually hand delivered mail. I heard that a couple of prisons in other states eliminated mail by only receiving emails for prisoners. They already outsourced the processing of prisoners' funds received from our family & friends now have to send any money for us to another state for processing.

But I must go with the times if I'm to be a part of our new world order-- COMPUTERS!!
