## INMATES WITH GUNS

At Columbia Correctional Institution (CCI) an inmate got shot inside the day room, in his dormitory with a 25 Automatic hand gun. Yeah, that's right, a hand gun inside a maximum security prison, here in the state of Florida. security, we've got a problem.

Now let me bring it to your attention that the Colonel at CCI whose the head of security was the Col here at Union Correctional Institution (UCI) in 2011-2012. When the security fell apart and staff was beating and killed an inmate. Also three of the Lt's that were here were promoted to Captains. And for what? The piss poor job they did here at UCI. Yes, Florida has a real history with promoting incompetent unethical individuals. FSP Warden James V. Crosby JR. over sees FSP. during the July 17, 1999 murder of death row inmate Frank Valdez who was stomped, kicked and beaten to death by 8 of Warden Crosby's correctional officers. This murder, got Crosby a promotion, all the way up to secretary of the Florida Dept. of Correction. stupidity and promotion run's hand in hand down here in the good ol' boy south! yes this col will no doubt, get a promotion to assistant warden or warden for this gun on the compound.

From what I hear 2 inmates were shot and the gun was recovered in the trash can, no shooter has been found. This, further supports legislative action, to put a bill in place, requiring staff, to wear personalized audio and video cameras, in these maximum security prison's, which would assist in the investigation of this gun, inmates. For an been in or around ring the inmates. Video cameras to keep drugs

and shooting of these officer should have that day room, obser- Personalized audio and are need in the FDOC weapons and other

Contraband From being sold to inmates on the black market, which jeopardises not just the security and safety of the institution, but the public as well. Call the House of Representatives at (850) 488-1157 or visit their website. [www.flhouse.gov](http://www.flhouse.gov) and tell them that we need a bill passed requiring staff in maximum security prisons to wear personalized audio and video device's to ensure the security of these prisons, to keep drug's, gun's and other weapon's, and escape paraphernalia out of the hands of maximum security inmates. The technology is available to ensure the safety of the American tax payer. And the time for change is now, not during a melt down and total disaster. Prevention is what's needed. Please contact the Florida House of Representative's and request this Bill proposal.

Thank you for your time and hopefully your help.

God bless you.

In Peace + Love

Annise ☺
