

WAR IN THE UKRAINE

Russia Invading the Ukraine and Annexing the Crimean Peninsula is an open act of war and an insult to the rest of the world. Remember the last time the U.S. became an isolationist country a fascist took power in Germany and tried to conquer the world while attempting to wipe out an entire race of people. Now here we are again, another dictator giving his country room to breathe and the U.S. is taking an isolationist stance. Someone needs to help the Ukraine defend itself against Russia, someone needs to show Russia the world will not allow another 1930s' Germany or another U.S.S.R. If the country that does this isn't the U.S.A., then I will be ashamed to be an American for the first time in my life.

TAKE CARE EVERYONE, PEACE" DONNY,
