## Something's Wrong

Page 1 of 2

In 2012 after the death of an inmate here at UCI, the secretary switched warden's assistant wardens, Col, Major's Captains Lt and got rid of some sqts and CO's. Those who were complicity with the illegal, unethical conduct that was taking place here. There's some unethical stragglers that survived the house cleaning. But the one area that should have been cleaned out, but has remained untouched, is the Classification Office. For their complicity with Warden Reddish's Administration was a major factor in inmates being abused, beaten, placed in strip cells in the dead of winter left to suffer in concrete and steel cells, with no blankets, no mattress, nothing but your underwear (shorts) and 30 degree temperatures. Classification made their weekly rounds as required under 33-Florida Administrative Codes, witnessed these unconstitutional acts of abuse, seen inmates with swollen eyes ect. Did they write reports? Did they contact the Inspector General's Office? Did they contact the secretary or state Classification? or the FDLE? NO! "Because Classification, who is suppose to be there to help, and assist the inmate was walking hand in hand with Reddish and the criminal element that was abusing us. Classification, has power. And yet through all these beatings and other scanddles that's taken place, Classification was the one Dept. that stayed intact. And the main Dept. that should have been broken up. This Classification here at UCI seems to be untouchable.

Why? Well that's a really good question, and one that people out there should be asking. This classification's hands are too dirty, they wallowed in the mud with the criminal element of Warden Reddish, and they come out smelling like roses. They were part of the problem yet they survived, and are basically sitting back, biding their time, till Warden Andrews retires or goes some where else. Which is what most of the unethical stragglers are doing, biding their time - hoping and praying that Warden Andrews leaves, so they can once again unleash hellish abuse upon prisoners. And given time, you will hear about it again, cause this is the Florida Dept of Corruption and the good ol' Boy system. You can contact Secretary Crews at (850) 488-5021 and inquire about this yourself. Something's wrong!

God bless you.

In Peace and Love

Ronnie
