"OBSERVATIONS"

As many of you know I spend a lot of time looking out my back window - Being in a Segregated housing unit of prison - gives me plenty of time to observe Free Staff traveling up & down the prison road in golf cart vehicles.

Over a years observation I could tell at distance which were males ~~at~~ Driving. The females always used Caution ~~and~~ while Driving and traveled at half the speed of the males. By these observations I was Right over "95" percent of the time. Men acted like they were reckless and on a speed way pushing the carts to the limit. I've made the conclusion women make Better Drivers.
