DEAR FRIENDS,

JUNE 15, 2014

GREETINGS, I hope and pray that my letter finds everyone reading this in the best of health and happy spirits.

I am surviving here am not in the best of spirits, the PA.DOC (the administration at S.C.I. Albion) transferred me to the prison I am now at and this had-has had a negative effect on my psyche, plus I was given a misconduct my first day here (planned no doubt in my mind) and that affected my funds for 2 $\frac{1}{2}$ months, but things -times are looking up, even though I've had to begin the whole process over in my struggle for a religious diet. The PA.DOC has no defense to justify denying the religious diet once a lawsuit is submitted, and they know this, yet they persist in denying the religious diet. Right now I'm just waiting for a answer from Central Office (PA.DOC Headquarters) to my repetitive request for a religious diet.

On the up-side of everything I have been doing some art-painting now that I have better access to art supplies.

Lot of concrete at this prison, was built 10 yrs ago and was designated Pennsylvanias new and improved architechture for a super-max security prison, from my window I see nothing but concrete, fence and blue sky or cloudy sky. The Yard has grass and the distant forest can be seen only bird species I've seen are crows, robins and black birds

there is some grass bordering the sidewalk on the walk to the Medical building and dining halls but I rarely go on that walk, this place is dreary there is no doubt about that.

After today I have 12 yrs, and ~~2 days~~ 11 months and 29 days to my minimum release date, been locked up continuously for 27 years now, looking back time passes by fast and looking forward it goes by slowly. It is the same for nature, it changes so slowly for each generation that what the youthful generation sees is normal, but for the older generations we see the lose. A world being destroyed by fire whether it be a forest fire or the fire of combustion engines, electrical generation or industry. it is all about fire and the civilization fire has built, even war is waged through fire's application to weapons.

What will the world be like when I get out of prison (hopefully) in 13 years? I already know, the trend of fire's advance can't be put out its been burning everything in its path for thousands of years. The best anyone can do is get their own little piece of nature and preserve it. Already old garbage dumps are being harvested for methane gas, in the future the billions of tons of plastic will be harvested from these dumps, as the earth's oil reserves are depleted. It's a Mad, Mad world we live in, and everyone is insane.

Well enough of my rant so I guess I'll be rolling along until next time, if there is a next time.

May everyone take care, stay strong and be happy with every little thing they do to preserve nature.

Blessings
Wildcat
