

SHIRLEYWORLD UPDATES  
"Let The Bullets Fly!"  
Chapter VI

by Timothy J. Muise

\* \* \* \* \*

**- CHOWHALL TASK FORCE PROVES EFFECTIVENESS / PRISONERS STARVED FOR FREEDOM**

Lt. Ban-The-Ham, Commander in Chief of the State Food Task Force, has received an award from Governor "turn and run" Patrick's office for limiting the portions of state rice and state potatoes hardened criminals in the ShirleyWorld complex receive. Lt. Ban-The-Ham stated, "I get \$75,000.00 a year to ensure that the handicaped and disabled prisoners eating in my chowhall stay trim and fit. They won't bulk up on my watch." Lt. Ban-The-Ham also received an award from the local pig farmers as they have seen an increase in the size of the hogs on their farms. Farmer Bucky Teeth told sources, "The only pigs I have ever seen bigger than this were the two ShirleyWorld female guards I dated last year." Not many know that the camp has a contract with these farmers to pick up the slop, as there are some nepotism clauses being violated, but Lt. Ban-The-Ham has an affinity for fat pigs as displayed in his credit card receipts from the Golden Banana.

**- DEPUTY DENIED-OH & SUPERINTENDENT BOOT TOLD: "BUTTON YOUR SHIRTS!"**

The Secretary of Public Safety's office issued an order this week to Deputy Denied-Oh and Superintendent Boot after hearing that they gave  $\frac{1}{4}$  ears of corn and plantation grown watermelon to the prisoners at ShirleyWorld on the Fourth of July. The order stated, "Button up your shirts ladies, your hearts are falling out!" Men die under their rule, doctors ignore deadly blood tests results, men are forced to wear bo-bo sneakers in the winter, and rogue guards abuse the weak daily, but the Queens of Rehabilitation think the cure is watermelon on the fourth! The NAACP was reached for comment and said it would investigate as the guards union went on the record saying, "If these bitches are going to feed them watermelon then they should have them picking the melons themselves." Stockholmed Syndromed prisoners actually support these acts of abuse as they long ago forfeited and desire for freedom or dignity. Sources say that The Deputy and The Super are thinking about providing cotton sheets for next year's Black History Month celebration.

**- PLANETS ALLIGN: ALL BUILDINGS AT SHIRLEYWORLD OPEN = GUINNESS BOOK INQUIRES**

"It is time for me to play the lottery!", one disabled and wheelchair bound prisoners was overheard saying the night this past week when all the buildings; programs, school, and Voc Ed, as well as the yard and gym, were all open! "Luck like this only happens every so often." the con went on to say. It has been reported that alarm clocks were placed in napping areas of the guards and since they were awake, for the first time in a long time, the decided they would see what it felt like to actually man a post. When reached for comment Deputy McCan't said, "This practice is not encouraged by my office. Somehow they slipped one past the goalie on this night. It won't happen again." Apparently the guards union has filed some PTSD claims for all the employees who were actually forced to work that night. Union spokesman Sgt. Layabout stated, "You can't expect these men to survive such

drastic changes in work ethic. We suffer when you cut this deeply into our nap time." Deputy Denied-Oh is negotiating with upper echelon union officials about placing military style cots at all posts. Captain Cant-Find-A-Way has called for 1000 t-shirts to be printed with the new motto, "We snooze the toughest beat in the state!"

**- T-SHIRT TASK FORCE EXPANDS ITS STRIKE FORCE / NO TIME FOR SERGEANTS**

The ShirleyWorld t-shirt task force has expanded its ranks by adding a second sergeant to help Sgt. Young-un patrol for the scourge of white t-shirts being worn in the Voc Ed building. Possibly this additional Strike Force member was added after the DOC learned that Sgt. Young-un was not allowed on any of the rides at Disneyworld. "If Walt thinks he is too short to ride Space Mountain then we have to seriously consider his safety while patrolling the mean streets of ShirleyWorld.", Captain Shebert commented. In typical Andy Griffith/Barney Fife style the DOC has afforded overtime for the sergeants as well as a single bullet for their pockets. We have been privy to inside information which reveals that the union may sue pop music icon Gary Neuman as his "Short People Got No reason To Live" was heard blaring from Deputy Denied-Oh's music program as the Strike Force patrolled the halls for contraband undershirts. "This only furthers our PTSD argument.", said union suicide prevention officer Lt. Kevorkian.

**- STATE POLICE RECONSIDER FAILED DRUG TESTS / NEWLY DISCOVERED SCIENCE**

In a bold stroke of luck for Lt. Shameless Peckerwood the State Police here in Massachusetts have decided to reconsider the failed drug tests of men like him who may have been suffering from undiagnosed "Gender Identity Disorder" at the time. Colonel Petra Manjohnson stated, "We know today that GID is a very real disorder. If men like Lt. Peckerwood were self-medicating due to their desire to have a "lady box" installed we now have to take that into consideration." The DOC is reviewing such policies as well. "If a guard under our employ wants to join the other team who are we to get in the way of that?", said Tolarence Deputy Ida Hoover. "Canabis can numb the senses and reduce your desire for a love-tunnel.", Deputy Hoover went on to say. ShirleyWorld will have to due without Lt. Peckerwood if he chooses to join the staties, and it would be the facilities loss as Sgt. Messy-Her was looking for another opportunity to whoop-up on Lt. Peckerwood, but he may have to consider that under the new science this could be considered a "domestic" assault and battery this time.

**- SHIRLEYWORLD INTERVIEWING FOR NEW "RECREATION COACHES" / LAZINESS ABOUNDS**

The facility is curenly interviewing new recruits from the DOC's "Academy" (sort of like the Police Academy movies) to take "positions" (the preferred position being head resting on desk asleep) as recreation coaches here at the facility. The "Red Shirts" as they are known are on paper as organizing and overseeing athletic events at the prison. Most of the current Rec Coaches are diasabled, discipline transfers, or just

too stupid (see Big Head Fred) to do even the most menial of guard tasks. Superintendent Boot even admitted, "Our standards are pretty low for these staffers. Basically if you can tie your shoes in the morning your in." Deputy Denied-Oh further elaborated upon the low standards, "We would hire one-celled amoebas but there is no place to send their paychecks." These new "recruits" have yet to attend the seminar where they all seal their souls over to Satan in order to work for the DOC but as soon as that process is complete whomever is among the chosen few to wear the coveted "Red Shirt" will begin their 25-30 year napping process toward a fat state pension!

**- LT. URINE SELECTED AS "MS. JULY" / CORRECTIONS MONTHLY SALES SOAR**

Lt. Urine was selected by the national magazine Corrections Monthly to be their July 2014 centerfold. As Ms. July Lt. Urine will have to answer some "bio" questions, kind of like a Playboy centerfold, and our news service has been provided with advance notice of the answers; Favorite Color: black & blue. Favorite Food: Beaver Split. Favorite Vacation Spot: Hades. Life Goals: "To haunt the dreams of former husbands and boyfriends till the end of time." Lt. Urine is reported to look sharp in the modified conductors uniform she wears in the photo shoot. The caption above her centerfold shot is "All aboard!", and she has that same big smile as when Mugsy's child support checks show up in the mailbox. The editor of Corrections Monthly, Will Torturem, said, "She is built really good, strong legs, but I think that she got them from chasing too many married men around the camp. Not my cup of tea." Congratulations Lt. Urine and "All aboard!"

More to Come...
