(Have we forgotten God)

Has the Country gone to hell - Seems like crazy attitude has been release into American main stream - If it feels good do it. That's the attitude of the new generation of young people. Our old people have become deaf to the turn of events - taking the back seat on issues they fought for year after year not allowing them to sleep into American culture. Things that were considered abnormal or indecent is now considered normal behavior. But for all these perversions we will pay for - just like when Roman greatness collapsed. The Taliban called us infidels - I think that is an understatement our young have no respect for law or our elderly. Our prisons are over stuffed & were not able to pay for it. We owe other countries trillions of dollars that we can't possibly pay back. We have coward in the world's eyes by pulling our troops out of the various countries with these countries execute evil because we failed to continue our armed forces when they were needed. Time will tell - One thing for sure - we have no honor for God and for that God will bring about great suffering to our streets. 9-11 was just a taste in what's coming.
