

① What does it Take?

I've been Told while we are Incarcerated that It is a time to Rehabilitate = To Restore to (a Normal State of life) by Training after a Period of Imprisonment. I couldn't agree less I've been focusing my life on reforming my life its behaviors and Thinking Process because in the Pass it always lead to trouble but seeking Drug Counseling and any Training has been fruitless I've been on this unit for a year and can't even get into a AA/NA Class Excuse me "Meeting" once a week due to Lack of Staff, There is no Training here for anything other than how to Verbally abuse "US" Inmates our Staff Assaults Inmates daily and Cover it up by stating we were suicidal or aggressively Violent. Then Conspire to have these statements sound the same. The officers will state they are here for our safety. (LOL) On the Back of their Caps is a Slogan

①

Protecting our own! Go figure!

I just don't see in Rehabilitating or Effect offered and I do not want the public misled by the system

I IN NO way have anything against the State of Texas. Its about honesty

I will say this I was placed in a class for Cognitive Thinking by Volunteering Its a class that is paid for by the Government But Its like this no one gets paid If no one is in the class. So Its basically a political profit to be made fortunately I had a good instructor and

learned alot in class ☺ only because they taught not merely from Experience but from the heart

If only there were more people with the heart to care about what it is they teach and not just by the Books Growth is from

3

Experiences shared and if we had
officers that showed the slightest
understanding they would have less of a
difficulty from other inmates. Some just
get a Gray Suit and it goes straight
to their heads when they get a little
authority I guess I've gone on a little
tangent.

Look forward to your replies.
