

reparations means to their damage, the damage done to us will be repaired when we have seized the power to control our lives our land & the resources that spring from it, the components of reparations apologies, promissory notes, money, precious metals & stones, technology transfers, freedom for political prisoners, transparent voluntary community parole boards, legislation in the enemies arenas, new communities, etc, are steps which must be taken to educate, agitate, & resolve some long standing problems in the short & long term on the road to reparations, if reparation is given to us here with in america, what effect will it have on us as a establisher of a society, what results can we as a whole envision if given monetary & or land reparations? what does history through out the world tell us about those victorious revolutionaries & their existence afterwards?

& what has nationalism, egoism, despotism, monarchism & religion done to shape such after lives? We must ask ourselves, what is the purpose & aim of our movements & struggles? are they directed towards the accumulation of wealth & the creation of one of the above governments, ruler ships or unions utilized through out the world today? one who participates in any form of revolution must consciously evaluate it's goals to measure them with the goals & struggles of those who failed or were momentarily victorious before them, but more importantly in order to out last our counterparts we must know that our aims are consistent with the ends of the creator of the land, air & sea which the movement will undoubtedly depend on. For without the support of the source behind all creation ones actions will become tiresome & unfounded in the long run
