sept. 2014 entry

ISRAEL. PALESTINE. THE CONFLICT.

will they all die?
When one look at the
plight of the Palest-
inian people, an ethnic
people, an indigeous
people. one can only

see the failure of an ethnic peoples plight. How they're
being marginalize because of an unsound social philosophy,
A CRAZY ASS ARM STRUGGLE CAMPAIGN. which I might as
well add. "that their weapon of shameful fame is the
suicide Bommer." which I might as well add got the PLO,
HAMAS, Fatah, Islamic Jihad signature written all over it
SO UNSOUND ARM STRUGGLE TACTICS...

one can only wonder if the brain child behind such thought
IS OR WAS ISRAELI, EUROPEAN, AMERICAN disguise to look
--- well you feel in the BLANKS...

Now no matter what the Palestinians do, it's consider as
A terrorist acting out. And not one of ethnic freedom for
AN ethnic RACE...

They're probably so gone, that they don't acknowledge themselves
AS ethnic. Its most likely came from AN extremely
unhealthy Islamic doctrine.

who force freed them that shit? ~~white~~ well, I guess surah 49
don't mean shit... well, I guess that don't matter now.
why? Because they're AN ethnic RACE on the edge of wipe
out cliff...

How do they prevent from being wipe out by A extremely
RACIST white supremacy Jewish order imported in from
Europe and the good ole U.S.O.F.A... And IF you think
there is not A heavy white supremacy order and thought written
in the Jewish state of Israel, then I suggest you think just
might as well accept that stupid ass death when it come...

I was sitting back and thinking about the failures of the
Palestinian social philosophy that funds their movement against
occupation. ~~white~~, when, while and after reading the
article out of turning the tide July-sept 2014 issue of
-The Anti-Racist Action Publication. And how they can
turn the tide of their losing battle and waro well!!
Let's look at their message that's out there on a 5
point social analytical view.

The Palestinian perceive view as I understand.

- (1) They declare war against all Jews and the Jewish
State of Israel.
- (2) They use unsound violent acts that will only be
consider as terrorist acts.
- (3) They acknowledge primarily as AN Islamic organization
and not A Palestinian state.
- (4) HAMAS, PLO, Fatah is or was acknowledge as the governing
Body of Palestine.

RANT TO RAVE

Sept. 2014 entry

As we know of, they don't have anything to shoot down a Israeli security Arr- anything not even a A-U-V.

(4) They must denounce terrorist acts like every other Islamic state or government recognized by the western world. They must clarify their stance as not being a war against the Jewish Religion or those who practice Judaism. But a resistance against Israeli occupation of establish Palestinian's land and crimes committed against the Palestinian peoples...

(5) THEY MUST HAVE A GOVERNMENT SEPARATE FROM RELIGION. They must establish a Commerce Department and go next door to Egypt, Jordan, etc. to do business... They already know where the capital must be. And they know why it must be in Gaza. They know they must stay away from talk of destroying Israel. They know that martial law and ~~curfews~~ curfews must be established and they most likely know better than anybody the problems with them. They most likely found countries that is helping with the educating and training those childrens they were able to get out to be the next generation of the Palestinian Government. They should have or already have appealed to the men and women of the Palestinian people to hold off on having any children for a specific amount of time as to ease the strain on the state of Palestine, its people, for a certain amount of years. They most likely have explained why. With all the education unions, workers unions, doctors unions, and so forth they must know all this shit and so much more.

So the question is what's up? maybe time.

maybe I should stop being like so many who's worrying about others dilemma and come up with a comprehensive plan (that's internalize) to get me out of this nice little predicament I'm currently in.

and while others may speculate on what I must do to obtain freedom and even may appthesize on whether I know such things, I guess I still fall to the same problem as others. Time...

I assert that ~~the~~ Time is the solution to the problem of time. What about you?
