Re: Inmate Clark, Ronald DC# 812974

Inmate Clark, I have received a letter forwarded to me by the Department of Health. I in turn requested some information from the Union Correctional Environmental Health and Safety Officer, Sgt. Diggs. In her investigation of the issues this is what information she was given.

The Captain in Death Row, P Dormitory states laundry is picked up Monday – Friday and washed and dried on a daily basis and returned to the dormitory. On the weekends each inmate keeps his laundry in his cell until Monday. This eliminates the issue of the laundry and mildew. As far as your meal trays the Captain stated that the trays are examined before issuance and you have the opportunity to bring a tray to the attention of staff if there is an issue with it. The Food Service Director also stated the trays are on a weekly cleaning schedule and are scrubbed thoroughly before placing into the dishwasher on that day of the week. Captain Jackowski also states he has had no additional concerns about mosquitoes.

Sincerely,

Patricia Perkins
Risk Management Coordinator
